

1)Issue: Button Size Breaks in Spanish Version

Description

When Spanish language is enabled on the Home Page, some buttons become wider due to longer translated text, causing inconsistent button sizes and breaking the UI layout.

Fix Required

- Make button widths responsive for multilingual text.
- Maintain consistent spacing and alignment across all buttons.
- Test UI layout for Spanish and other localized languages.

2)Issue: Text Visibility Problem in Dark Mode

Description

On the Home Page, under the “**Choose Your Learning Path**” section, the text color on the cards is not properly visible in Dark Mode, affecting readability.

Fix Required

- Update card text colors for proper contrast in Dark Mode.
- Ensure readability and UI consistency across all themes.

3)Issue: Heading & Subheading Visibility in Dark Mode

Description

In the “**Every Way to Get Around Covered**” section on the Home Page, the heading and subheading text colors are not properly visible in Dark Mode, affecting readability.

Fix Required

- Adjust heading and subheading colors for better contrast in Dark Mode.
- Ensure text visibility and consistent UI across all themes.

4)Issue: CTA Button Not Navigating

Description

On the **Independent Mobility** page Hero Section, the “**Take Our Independent Mobility**” button is not clickable/navigating properly on click.

Fix Required

- Fix button click functionality and redirection.
- Ensure the CTA navigates to the correct page or section.

5)Issue: CTA Buttons Not Working

Description

On the “**Are You Ready To Be Independently Mobile**” section of the Independent Mobility page, both CTA buttons are not working and do not redirect on click.

Fix Required

- Fix click functionality for both CTA buttons.
- Ensure proper navigation/redirection is implemented.

6)Issue: Heading Text Overflow in Spanish Version

Description

On the Spanish version of the page, the “**Challenges to Prepare**” heading text breaks into multiple lines and overflows outside the card layout, affecting UI alignment and readability.

Fix Required

- Adjust card layout and text responsiveness for longer Spanish translations.
- Ensure heading text stays properly aligned within the card boundaries.
- Maintain consistent card design across all languages.

7)Issue: CTA Buttons Not Working in Seeded Modules Section

Description

In the section where the seeded modules are displayed, the CTA buttons are not functioning and no action occurs on click.

Fix Required

- Fix CTA button click functionality.
- Ensure proper navigation or action is triggered when buttons are clicked.

8)Issue: Card Text Visibility & Color Inconsistency

Description

On the “**Understand Your Upcoming Journey**” section of the Mobility Checklist page:

- In **Light Mode**, the card text color appears inconsistent.
- In **Dark Mode**, the text on the cards is not visible properly.

Fix Required

- Correct card text colors for both Light and Dark modes.
- Ensure proper contrast and readability across all themes.

9)Issue: Button Navigation Check Required

Description

Some buttons across multiple pages may not be redirecting correctly or working as expected.

Fix Required

- Verify and test navigation/redirect functionality for all buttons across the application.
- Ensure each button correctly routes to its intended page or section.

10)Issue: Button Layout Breaking in Spanish Version (Light & Dark Mode)

Description

On the “**Evidence Based Practice Framework**” section of the Tools for Professionals page, in the Spanish version, buttons are not displaying properly in both Light and Dark modes due to longer translated text, affecting layout alignment.

Fix Required

- Improve button responsiveness for multilingual (Spanish) text.
- Ensure proper layout in both Light and Dark modes.
- Maintain consistent button alignment and spacing.

11)Issue: Image Not Rendering on Research Page

Description

On the **Research Page**, one of the card images is not rendering and appears broken or missing.

Fix Required

- Check image source/path and ensure it is correct.
- Verify image is properly loaded and accessible in all environments.
- Add fallback handling for missing images if needed.

12)Issue: Text Visibility Problem in Dark Mode (Help Center Page)

Description

On the **Help Center Page**, text in Dark Mode is not clearly visible due to improper font color contrast, affecting readability.

Fix Required

- Update text color for better contrast in Dark Mode.
- Ensure consistent and readable typography across all sections.

13)Issue: Missing/Inconsistent Content from Database (Terms & Cookies Page)

Description

On the **Terms and Cookies Page**, content is not being properly fetched or displayed from the database, resulting in incomplete or missing sections.

Fix Required

- Verify API/database integration for the page content.
- Ensure all required content fields are correctly mapped and returned.
- Handle missing data gracefully with fallback content if needed.

14)Issue: Email Login Button Redirects to Localhost After Instructor Approval

Description

When a Super Admin approves an instructor request to join the LMS, the approval email is sent successfully. However, the **login button in the email redirects to a localhost URL instead of the live production base URL**, causing navigation failure for users.

Fix Required

- Identify and update the base URL configuration used in email templates.
- Ensure environment variables (dev vs production) are correctly applied.

- Replace any hardcoded localhost links with dynamic live environment URLs.
- Verify email generation logic uses the correct deployment environment settings.

15)Issue: Missing “Upload Video Manually” Option in Video Resource Section

Description

When a Super Admin creates a module, in the **Video Resource** section the option to “**Upload Video Manually**” is not visible in the UI. However, the video link field/data is still present, indicating the feature exists but is not being displayed correctly.

Fix Required

- Check UI condition/permissions controlling visibility of the “Upload Video Manually” option.
- Ensure the option is correctly rendered for Super Admin role.
- Verify no frontend condition is incorrectly hiding the component.
- Confirm functionality is consistent when video link is available.

16)Issue: Unnecessary Manual Steps After Quiz Completion

Description

After a learner completes a quiz, they are required to click “**Continue**” and then “**Mark Complete**” to finish the step. This creates an extra manual action that negatively affects the user experience.

Fix Required

- Automatically mark the step as completed once the quiz is successfully submitted and passed.
- Remove the need for users to click “Mark Complete” after quiz completion.
- Ensure the system updates progress status in real time upon quiz submission.

17)Issue: Feedback Form Not Fully Displaying After Module Completion

Description

When a learner completes a module, the **feedback form is not displayed properly**. The layout is not responsive and appears broken or partially visible across different devices.

Fix Required

- Make the feedback form fully responsive for all screen sizes (desktop, tablet, mobile).
- Ensure all form fields and buttons are properly visible and accessible.

- Fix layout issues so the form renders consistently after module completion.

18)Issue: Password Setup Email Redirects to Localhost

Description

When a Super Admin creates **learner and instructor accounts**, an email is sent for setting password credentials. However, the URL in the email is incorrectly pointing to **localhost instead of the production base URL**, causing access issues for users.

Fix Required

- Update email template to use dynamic base URL instead of localhost.
- Verify environment configuration for production vs development.
- Ensure password setup links always point to the correct live domain.

19)Issue: Incorrect Text in SweetAlert on Instructor Block Action

Description

When clicking “**Block**” on an **Instructor**, a SweetAlert popup appears, but the displayed message is not the correct/actual text. It appears to be missing or incorrect due to missing localization.

Fix Required

- Add the correct SweetAlert message text in **JSON localization files (EN & ES)**.
- Ensure both English and Spanish translations are properly mapped.
- Verify SweetAlert uses localized keys instead of hardcoded text.

20)Issue: Learner Block Status Not Reflected in Super Admin UI

Description

When a **Super Admin blocks a learner account**, the learner is successfully blocked, but the **UI does not update accordingly**. The status icon does not change and the “Blocked” state is not shown in the Super Admin panel.

Fix Required

- Ensure learner block status is updated in real time on the Super Admin UI.
- Update status icon/label to reflect the blocked state correctly.
- Verify state refresh or API response is properly triggering UI re-render.

Confirmation Required: Course Visibility for Instructors

Description

Instructors now have the ability to **lock any course assigned to learners**. We need to confirm the correct behavior for course visibility in the instructor view.

Options to Confirm

- **Option 1:** Display all courses to instructors regardless of learner permissions.
- **Option 2:** Display only courses based on the learner's assigned permission type, showing only relevant categories/modules.

Required Decision

Please confirm whether instructor access should:

- Be **full visibility of all courses**, or
- Be **restricted based on learner permission type and assigned categories**.

Confirmation Needed: Module Lock Behavior After Category Reordering

Description

When a learner completes a module, and the Super Admin later changes the **category order**, the current implementation results in that module being locked.

We need to confirm the expected behavior for this scenario.

Question for Confirmation

How should the system handle completed modules when category order is changed?

Options

- **Option 1:** Keep completed modules unlocked and unaffected by category reordering.
- **Option 2:** Recalculate and apply locks based on the new category order (may affect previously completed modules).
- **Option 3:** Preserve completion status and only update navigation order without impacting access.

Required Decision

Please confirm the intended behavior so the system can be aligned accordingly.
